DOCTORAL SCHOOL

The aim of the Doctoral School is to educate doctoral students and support them in their preparation of a doctoral dissertation and the attainment of a doctoral degree.

The education process consists of providing doctoral students with comprehensive knowledge, and developing their skills and the competences necessary for conducting research which is carried out as a part of an Individual Research Plan.

Support is also provided with the preparation of a doctoral dissertation.

EDUCATE DOCTORAL STUDENTS AND SUPPORT THEM

PROVIDING COMPREHENSIVE KNOWLEDGE

DEVELOPING SKILLS

COMPETENCES NECESSARY FOR CONDUCTING RESEARCH

DOCTORAL SEMINAR

The aim of the Doctoral Seminar is to enable people working professionally to obtain a doctoral degree by acquiring the relevant knowledge and skills of individual scientific work under the substantive supervision of a supervisor or supervisors.

As a part of the doctoral seminar, it is possible to prepare an implementation doctorate, which allows you to combine research and your professional work.

The implementation doctorate should have a practical dimension, it allows you to prepare a doctoral dissertation that will improve the operation of the organization or facilitate the development and implementation of an original design, construction or technological solution in the entity employing the doctoral student.

ENABLE PEOPLE WORKING PROFESSIONALLY TO OBTAIN A DOCTORAL DEGREE

COMBINE RESEARCH AND YOUR PROFESSIONAL WORK

PRACTICAL DIMENSION

IMPROVE THE OPERATION OF THE ORGANIZATION

INDUSTRIAL PhD

The industrial doctorate is an alternative way of obtaining a doctoral degree, it is intended for people who want to develop their scientific and professional careers at the same time.

The main result is the preparation of a doctoral dissertation, which aims to improve the functioning of companies. It is a program of the Ministry of Education and Science - doctorate, the purpose of which is to create conditions for the development of cooperation between the University and the socioeconomic environment, it is conducted as a part of the doctoral schools and consists of educating doctoral students in cooperation with their employers or other entities (cooperating entities).

The effect of this sort of education will be the implementation by entities and entrepreneurs of the results of scientific activity conducted by doctoral students.
