

WSEI University

NURSING

INNOVATIVE EDUCATION
AND MODERN OFFER

WHY IS IT WORTH CHOOSING THIS COURSE OF STUDY?

- **The diploma** in Nursing is **recognized in all EU countries**.
- **Practical study programmes**.
- In the course of their studies students undergo **professional practice**: 1st cycle of studies 1200h, 2nd cycle of studies 200h.
- Classes conducted by **practitioners**.
- During the bachelor's degree programme, the student writes a **diploma thesis** and **defends it during the diploma exam**, which also includes a **practical section** (according to the educational standard).
- At the end of the second-cycle studies, the student writes a **master's thesis** and **defends it during the diploma examination**.

FIELD OF STUDY

Bachelor's degree

(7 semesters)

- **AVAILABLE IN LUBLIN AND IN THE BRANCH UNIVERSITY IN WARSAW**
- **CLASSES IN THE CENTER OF MEDICAL SIMULATION**

The WSEI University has a **didactic base and infrastructure in Lublin and Warsaw branches** which ensures the full implementation of the learning outcomes planned in the curriculum over the course of study in the field of NURSING, the teaching offer includes **lecture halls, teaching rooms, IT labs, language labs**, and most importantly a **nursing skills lab**.

Practical classes and internships will take place in health care providers such as **hospitals, health centers and healthcare facilities**.

The main goal is to **improve the quality of nursing education through classes** in conditions that simulate real tasks in the work of nurses in a hospital.

Human-like simulators are programmed to present specific disease symptoms to which the **student must apply the medical techniques or procedures learned during their studies**.

The Center of Medical Simulation **extends the opportunities for practical education** with features related to patient care, especially in the face of complex medical problems.

ACQUIRED QUALIFICATIONS AND SKILLS

Upon graduation, you will be able to:

- Provide services in accordance with current medical knowledge for **health promotion, health maintenance** and **disease prevention**,
- **Provide nursing care** to sick, disabled and dying persons,
- Work by **professional ethics** while respecting and upholding the rights of patients,
- **Communicate** in the workplace, **organize your work, collaborate** in health care teams, and also **initiate and support community health activities**,
- **Prescribe medications** and the **use of specific medical devices** by applicable laws and regulations and take a **professional approach to pharmaceutical industry** marketing strategies,
- Conduct scientific **research work** in nursing,
- **Lead and manage teams** of nurses and midwives.
